

HEAD COVER, DISCHARGER POLYESTER, CONDUCTIVE TEC100

The Mercatus **TEC100** Head Cover is made of lightweight polyester knit fabric that is groundable and easily laundered. The fabric is well suited to removing static charges from windscreens and canopies. It is made from monofilament thread with a grid pattern of carbon-suffused monofilament nylon. The grid pattern is knit into the fabric and designed to provide the best grounding performance. All seams are designed to maximize conductivity from panel to panel.

The **TEC100** Head Cover is a consumable replacement item to be used on the **Mercatus International MSW100 Telescoping Aircraft Electrostatic Discharger**.

The **TEC100** Head Cover must be kept clean and should be removed from service if damaged or torn. It should be washed in cool or cold water, hand dry or dry at 120 degrees Fahrenheit, or less. **DO NOT USE BLEACH OR FABRIC SOFTENER.** The lightweight fabric will dry very quickly.
